PROJECTS

- Hike Gear Nepal**
Hike Gear Nepal is a web-based platform designed to support trekkers and hikers in Nepal by providing a one-stop solution for all their trekking equipment needs. The website aims to make trekking gear more accessible and affordable by offering both new and second-hand products for sale, as well as rental options with security deposits.
<https://github.com/Miharth/Hike-Gear-Nepal>
- Amazon**
The Amazon Frontend Clone is a responsive replica of the Amazon e-commerce website's user interface. Built using HTML, CSS, and a touch of JavaScript, this project demonstrates a strong understanding of layout design, component structure, and UI/UX best practices. It replicates the look and feel of Amazon's homepage and product listing interface to provide a realistic user experience.
